POST-GLYCOLIC CHEMICAL PEEL INSTRUCTIONS

1. Generally, makeup can be applied one day after treatment.
2. Avoid exercise for at least a few hours after each procedure.
3. Direct sun exposure without sunscreen of SPF 15 or higher must be avoided during the glycolic acid treatment cycle.
4. Wait one day after each treatment before resuming glycolic acid based home care products. Do not resume application of these products if you are experiencing any irritation. Wait until all signs of irritation are gone before resuming application of glycolic acid based products.
5. If irritation is not resolved within 48 hours, please contact clinical services at 617-731-1600, extension 1677.
6. Do not use Retin-A, Differin or Tazorac for at least 48 hours after your treatment, unless directed by a physician.
7. It is common immediately after Glycolic peel to experience temporary dryness. A noncomedogenic fragrance free moisturizer may be used.
