

SKINCARE PHYSICIANS®

Your SkinCare News & Updates

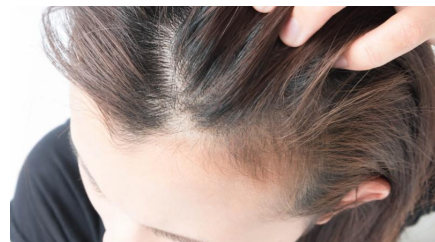

Greetings,

In their never ending quest to improve patient care and outcomes, our dermatologists are at the forefront of cutting-edge procedures. They are also constantly helping to advance existing successful and reliable treatments through research and development of novel protocols and programs. Find out about the latest skin treatments and products available to you at our practice.

The SkinCare Physicians Team

A natural solution for thinning hair

Don't let thinning hair get you down. The dermatologists at SkinCare Physicians have a new technique called PRP (platelet-rich plasma). This all-natural, non-invasive hair restoration treatment stimulates hair regrowth and reduces the effect of thinning.

Learn how PRP is changing the way we treat hair loss

Faster, better skin tightening

Faster than the original device (the treatment lasts only 35 minutes), Thermage FLX improves patient comfort and significantly enhances results. While the procedure is known to tighten and smooth the skin on the entire face and body areas, it can also prevent skin aging.

Here is what Thermage FLX can do for you

Improving lip lines just got better

We are very excited about our advanced upper lip lines program combining Botox or Dysport with fillers and the new OMAR laser procedure, which was developed at SkinCare Physicians to perfect the results. Our research shows 50% improvement in the length, depth and number of these upper lip wrinkles.

More about our advanced lip lines program

CoolSculpting: Do it in the right place

CoolSculpting has become an extremely popular way to eliminate unwanted fat without surgery. Patients literally can go from the treatment table right to work or play, and results are long lasting... should the procedure be done in the right place. People forget that CoolSculpting remains a medical procedure which should be supervised by a trained physician.

Watch five physicians explain

A custom serum just for your skin!

Have you ever dreamed of a beauty product customized for your specific skin? With Custom D.O.S.E, a revolutionary skin care technology, we can now create a tailor-made corrective serum combining the best cutting-edge brightening and anti-aging ingredients.

Learn how Custom D.O.S.E works

New aesthetic suite coming soon

A brand new aesthetic and nursing suite will soon open its door at SkinCare Physicians. Our aestheticians and cosmetic nurses can't wait to welcome you to this elegant spa-like space and introduce you to our fabulous treatments.
