

Have Thin Lips?

You are invited to participate in a research project.

Purpose: To evaluate the safety and effectiveness of a new dermal filler device (gel injected into the lips) for lip augmentation and correction of perioral rhytids (wrinkles around the lips).

This is a randomized research project, which means that you will be randomly assigned to receive either the study product (SMA-001) or Restylane Silk.

Visits: There will be 6 to 11 in-clinic study visits at SkinCare Physicians, as well as 2 to 6 phone call follow-up visits. The in-clinic visits will last from 30 minutes to 2 hours. The entire study will last up to 12 months.

To qualify, you will need to meet the following criteria:

- Male or Female at least 22 years of age or older.
- Must have thin lips (similar to the photo above)
- Must refrain from having any other aesthetic therapies to the lower two-thirds of the face.
- No tattoo(s), piercings, facial hair or scars on or around the treatment area.
- No known medical conditions of bleeding disorder, heart disorders and drug allergy.
- No neurotoxins for 6 months, HA or collagen for 12 months, semi-permanent filler 24 months in the treatment area prior to enrollment.
- No permanent fillers of any kind.
- No laser/light therapies, prescription strength retinoids, chemical procedures such as peels or dermabrasion to the lower two-thirds of the face 6 months prior or during the study.

Compensation for time and travel is provided + Treatment is covered by the study.
