Greetings!

Welcome to SkinCare Physicians online newsletter!

Yes, we are going digital to communicate more frequently to our patients the great things that are happening in skin care and at our practice. But by popular demand, you will still receive our annual printed newsletter which will recap the main events, hot treatments and practice's news of the year.

Now, get ready for the summer and find out about the latest body contouring, sweat and anti-aging treatments!

The SkinCare Physicians Team

New CoolSculpting applicators allow us to treat more body parts

The CoolSculpting program at SkinCare Physicians has successfully helped many of our patients to lose a few inches and attain the shape they desire. Today we are able to offer two brand new options to effectively treat inner and outer thighs, a highly demanded area for treatment by our patients.

We now have two CoolSculpting devices that can be used simultaneously cutting your treatment time in half!

[More on CoolSculpting](#)

We support many charitable organizations and were proud to contribute \$5,000 to the MFNE at our recent Spring Event.

Speaking Engagements

The American Society of Laser Medicine and Surgery recently held its Annual Meeting, Laser 2014. This event is considered the best meeting to learn about the latest in lasers, light and energy based devices. Five members of SkinCare Physicians had a prominent presence in the meeting.

Voluma, the new anti-aging filler on the block

Have you heard about one of the newest fillers: Voluma. SkinCare Physicians was one of the first practices in the nation to use this newest addition to the Juvederm family of injectable fillers. With exciting new technology, Voluma promises to be a long lasting (up to 2 years) powerful volumizing tool for anti-aging.

The dermatologists at SkinCare Physicians use it to augment the cheeks, jawline, temples and chin, producing smoother and more youthful contours. For many patients, careful volumizing can produce results that are far superior to, and more natural than, a facelift. The excellent longevity and superb natural look of Voluma promise to make it a go-to product at SkinCare Physicians. Stay tuned...

Does excessive sweating concern you?

Most of us are looking forward to the summer. But for some of you who are suffering from excessive sweating, hot temperatures are rather a reason of concern. "Sweat no more", we have a long term cure for underarm sweat/odor with Miradry, an amazing, proven treatment that has improved the quality of life of many of our patients.

Leading the Way in Skin Care

SkinCare Physicians hosted a wonderful educational event, Leading The Way in Skin Care, on May 10th at the Four Seasons Hotel in Boston. The turnout was fantastic with 325 guests and standing room only. The presentations by eight of our physicians were not only informative and educational, but fun!

They were very diverse and covered the latest medical and cosmetic advancements in skin care, from new devices for non-surgical body sculpting and, advances in filler techniques, skin tightening and Botox®, to latest cutting-edge treatments for skin diseases and scars, and much more. Best of all, attendees came away with quite a few skin care tips.

If you were unable to attend, you can get the best tips from our event by checking out [#SkinTakeaways](#) on Twitter, or by following us [@SCP Chestnut Hill](#).
